Chess is called the game of kings. It has been around for a long time. People have been playing it for over 500 years. Chess is based^a on an even older^b game from India. The chess we play today is from Europe.

Chess is a two-player game. One player^c uses the white pieces^d. The other uses the black pieces. Each piece moves in a special way. One piece is called the king. Each player has one. The players take turns moving^e their pieces. If a player lands on a piece, he or she takes it. The game ends when a player loses^f his or her king. There are a few more rules, but those are the basics.

Some people think that chess is more than a game. They think that it makes the mind stronger^g. Good chess players use their brains. They take their time. They think about what will happen next. These skills are useful^h in life and in chess. Chess is kind of like a work out for the mind.
